

Special Topics Team Presentation
Chapter 6: Analyzing and Interpreting Quantitative Data
Saturday, November 14, 2020
Cassandra Chavira, Charlotte Conner, Joannie Caraballo-Lopez

Topics:

1. Outline and discuss the measures of central tendency with examples of each.
2. Evaluate and discuss the characteristics and importance of the normal curve in the context of analyzing and interpreting quantitative data.
3. Finally, outline and discuss the use and importance of graphical displays of data. Explain the four major figures Creswell discusses as well as examples of each, including variable types, etc.
